

A group of members from the DARC-Ortsverband Stiftland, DOK: U23 made their first DLFF-activation at april, 18 2010. As location we selected Neusorg. Operators: Manfred -DF6EX- and Xaver -DK4RM-

Starting at 1012UTC with first QSO with RU6YZ altogether 560 QSO´s were made.

Last QSO was with DJ5BF at 1547 UTC.

50 percent of the QSOs were made on 40 Meter. The other big band with 45 percent was 20 Meter. Propagation was sometimes very poor, about 1,5 hours nearly no conditions and extreme low QSO-rate. Location was in a wooden house in Neusorg. Antennas a G5RV plus a multiband-trap-dipole. Equipment Yaesu FT990 + FT2000.

Special thanks to Günther -DC2RK- and his xyl Hilde for their great hospitality.
73, 44, Team DA0CW/p

1. Manfred -DF6EX- and Xaver -DK4RM-
2. The QSL for this activity, thanks to Heinz -DL7RAG- for the QSL-work
3. Manfred -DF6EX- operating mainly SSB
