Hirtlohweiher bei Schwandorf DLFF-0579

DLFF-0579 entrance and car-shack

At 20. october it still was sunny, so we went on a trip to Hirtlohweiher, which is bordering very close to DLFF-0144 and is located near Schwandorf, about 30 km away from Regensburg. The last km were more or less in total a construction area on the road. Tried from various directions until we found a way to come to the area which is just outside of Schwandorf.

We arrived short before 1200 utc and just after building up the antenna a park-ranger appeared. At first he was not so satisfied with our activity however after a few minutes argumention we could continue.

We had to shift several times between the bands. Also attempts in CW were

not so successful. After a bit less than two hours we finished the operation with a total of 207 contacts in the log. Also some DX-stations were included with a total result of 30 different DXCC-countries including 9 P2P (portable to portable park-to-park-contacts). Top three countries italy, followed by poland and germany.

73, 44, 11,
see you next time
