Altes u. Neues Schloss Dießfurt DL-04413+04414
Schloss Troschelhammer DL-04418

At the end of the outdoor-season we just wanted to hand out some multi-activity for the castle-hunter. After the successful WWFF-operation the day before, we hoped that it will continue same way, however luck was not with us. We decided for the only possible three castle-location in the closer-area near Pressath. We were active there almost exact 5 years ago as DAØWCA. After driving the first 25 km the shield for road works appeared and we had to swing around in a large circle. At the end we had to drive the 1,5 times of the distance to arrive there.

We started at 1305 utc and there was a very small progress on 40 meters. 20 meters was almost dead. When spotting in the cluster the spot was running so quickly through as there was the day before WWDX-contest and a lot of DX was spotted with their warm-up activities. When I finally tried my way on the other bands the antenna-tuner became defect. So Murphy was not with us that day but anyhow we tried the best under these circumstances. This time only 141 contacts could be done with 30 countries. Reading some stories about the WWDX one day later they had the same bad experience, so you cannot change the propagation. Nr. 1 country was italy with 33, followed by germany with 32 and poland with 13 QSO.
