Nature Reserve Weichselbrunner Weiher und
Trockenkiefernwald bei Bodenwöhr
DLFF-0393

When interest on our location at DLFF-0616 dried out, we decided to do on the homeway a short jump to DLFF-0393.

This wooden area is just about 10km away from DLFF-0616.

I was there some years ago under terrible conditions, with temperatures up to 35 degrees. This time much more comfortable but anyhow it was only for a short stop.

When sitting the whole morning on the keyer or the microphone you have reached the point where you don't want to extend it too long as simply the power is over.

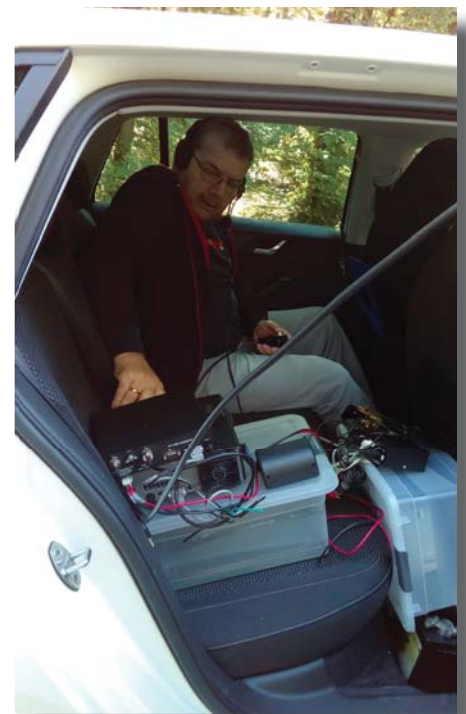

We found a nice place where we did really a quick and dirty setup. Only putting up mast and Windom with one station.

While Konrad tried to improve the short stay with spotting us several times in the cluster, because contest would start in short time, I rebuild the provisoric setup.

We altogether were 40 minutes in the air and could hand out this park to 98 stations including 6 p2p QSO.
Lot of bikers came along on the small windy road.

This time, the top-leading three countries were poland, italy, belgium.
Altogether 22 countries made it into the log.

Last activity in 2016 was mainly in CW,
this time we were active in phone only to keep setup and changes as short as possible.

quick setup in the car
