Castle Thanhouse - Nature Park nördl. oberpf.Wald
DL-04953 - DLFF-0093

On my latest holiday in october decided again very quick to do another castle-trip. This time selected Castle Thanhausen, first time built in the 13th century, several times damaged or burned down, the last construction is from the 18th century however in very bad condition with a small church aside.

When entering the area it started to rain and I wasn't sure if it could be a longer episode. Dark clouds and extreme high winds very critical at the begin.

I put up the antenna a bit outside the small village on top of the hill. After the first hour weather changed a bit and sun came out and made it finally a pleasant stay there.

Total length of the operation was 2 hours 20 minutes. 20 meter conditions again very poor that day, so most activity again on 40. Altogether 272 stations in 34 countries could be worked, 210 in phone, 62 in CW.

This time nr. 1 germany with 68 contacts, 2. italy with 34, 3. poland with 30, 4. france

with 15 and as 5. belgium and russia with 13 each. Thank you for calling.
