Castle Waldershof DL-02830
DLFF-0119

It was like an odyssee. I started after work good in time to OKFF-0846, just before arriving had to turn, cause a heavy storm appeared. Changing direction to the Castle of Brand. When putting out the battery of the car a thunderstorm started so had the only possibility either to drive back home or searching my luck on another place. Finally drove behind Waldershof where the sky was looking a bit more friendly. However lost a lot of time with all those actions. Finally it was 1504 UTC

when I made the first call there. Propagations were extreme bad and so a lot of work for my voice with calling and calling. In total I was qrv for almost exact two hours. 128 contacts were made. Also here lot of distortions and QRN.

Most contacts this time done with italy (28), followed by germany (26) and poland (9). This time also CW couldn't help so finally built down everything around 1700 UTC.
