DQ11WCA

Nature Park Steinwald DLFF-0119
Castle Trevesenhammer DL-03956

With our special-call DQ11W-CA I started at 25.june for an evening-check of the conditions in front of the next planned WWFF-trip.

Some delays on the road caused, that I could start there not earlier than 1540 UTC.

Temperature still was very high, used the same location near the small village, where I was active in 2015 the first time from there.

Conditions were terrible and the first half hour lost almost my voice from senseless unanswered CQ-calls. Propagati-

on to all closer countries was totally dead, 20 meters was completely down. So at the end I tried again my luck on 40 meters in CW. With just 24 different countries this was one of the badest activities during the past time.

Finally with the help of CW could struggle to get 122 contacts together. The first three countries Germany (30), poland (15), russia (11). So also italy was not easy to catch that day, which tells a lot about the quality of conditions.

101 QSO were made in CW and 21 in phone.
