Nature Park Steinwald - Castle Fuchsmühl
DLFF-0119 + DL-04225

Another holiday for me, however my xyl needed to go into her work. So finally no other opportunity than to go out in the field again.

Weather forecast was not promising. I hoped that the 40 percentage of rainfall would not come in that area but finally was wrong.

Selected this time a small wooden way on the opposite road-side of the Castle of Fuchsmühl which is currently a hotel.

This was my 4th activity from there. At the begin I had nearly a bit sunshine in the background and I could set up the antenna with dry feet.

However then quickly the sun disappeared and it started to rain endless with some dry phases for some minutes inbetween. So only chance was to continue until the weather improved a bit and could build down everything in more or less acceptable conditions.

Altogether 200 contacts made it into the log, 93 telegraphy vs. 107 phone QSOs.

33 countries could be reached with the top 5 going to 1.italy (35), 2.germany (32), 3.english and russia with 15 each, 4.france (12) and on 5th place belgium, poland, switzerland with 10 contacts to each of the three.

So very wide distributed and on similar level in europe
