Niedermoorgebiet bei Georgenberg
DLFF-0471

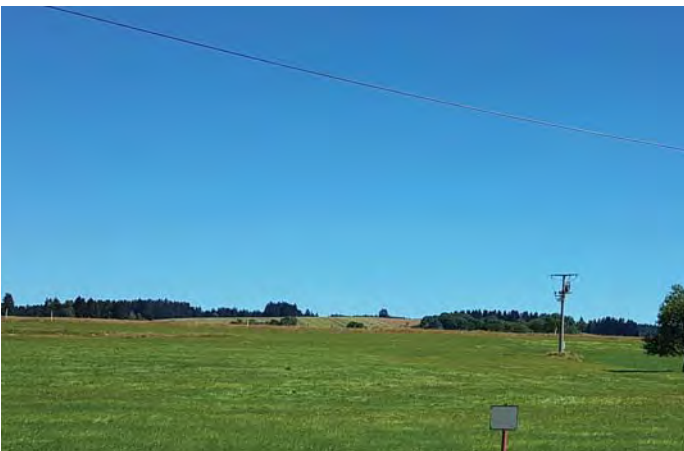

One week after the latest „mountain-trip“ we originally planned to go to the next summit, however then temperature was too high, with expected up to 35 degrees. As alternative-program I selected a single-trip to the moor-area near Georgenberg. Was there last time in 2017 and started a bit earlier to avoid the extreme temperature around midday. The first caller was our teammate Günter DC2RK. Conditions were not too good, so had to change several times band and mode and finally was active there for 2,75 hours. 36 countries could be reached on 20, 30 and 40 meters. Grand total were 287 contacts composed by 208 phone and 79 telegraphy QSOs.

Top countries were Italy with 62 contacts followed by Germany (46) and Poland (21). Close behind Belgium (18) and France (17). ODX was USA. At midday had to pull down as temperature became incredible and conditions rapidly went down.
