Moorgebiet bei Bärnau
DLFF-0580

After the positive result from my activity a day before, decided on october 04 to go out again.

This time went to Moorgebiet bei Bärnau. Was there already at march 15 this year, just that time when the lockdown started.

Weather forecast was dry, but cool. First contact was at 1322 utc with OZ8CTH. Begin was slow and poor conditions.

After 5 minutes my friend Konrad DH6RAE, partner from previous DAOCW-operations, was calling in. His home-location is just 10 kilometer away from that location.

He decided quickly to give me a visit and together with his son-in-law Andy and his two grandchildren he appeared on site.

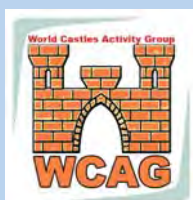

Andy was also part in our DLFF-0659-operation from Kösseine some weeks ago.

Finally between 1445 and

1545 UTC the conditions improved and the band opened also a bit into the closer environment.

Lot of people were also enjoying the beautiful sunny-day and walking around and also walking into nearby czech-republic, just a few hundred meters away.

I tried 40, 30 and 20 meters, however 20 and 30 with very poor propagations. So main-activity on 40 meters.

Moorgebiet bei Bärnau
DLFF-0580

Final result were 273 contacts with 35 different countries.

Top-scorer Italy with 61 contacts, place 2 to Poland with 31, followed by 3. France 24, 4. Germany 21 and 5. England with 16.

Finally at 1616 made the last contact with 2E0FWV. Sky meanwhile very dark and had to close down.

Thanks to all stations for calling in and see you from next one.
