Nature Park nördl. oberpfälzer Wald DLFF-0093
Castle Wildenau DL-02337

At the castle Wildenau my latest activity was in december 2015.

So was time to bring it back into the air. On June 14th started on a very hot afternoon after the QRL in direction Wildenau.

A lot of traffic on the road and the search for an acceptable location brought me very late to this single tree on top of the mountain.

So first contact was on 1530 UTC with IOENA.

At the begin it was running very slow, not too many stations

readable. Then around 1600 UTC the band opened more also to the lower distances and also a lot of german stations calling in. This good propagation lasted for about one hour and then the band closed again and the last 30 minutes again very poor.

Also in the CW-portions of the bands not too many interested stations. Especially 20 meter absolutely down this day.

Finally had a mix of 181 SSB-contacts vs. 27 CW-QSO.

So total result were 208 contacts in exactly two hours operating time.

Top 5 countries this time: 1. Germany (71) 2. Italy (29) 3. Poland (26) 4. France (12) 5. England (8), altogether 31 countries in the log.

Thanks for calling in and cuagn soon.
