Naturpark nördl. oberpf. Wald DLFF-0093
Castle Plössberg DL-04900

After two sunny days with biking and heavy feet I switched back to my second passion, ham-radio. After work I moved behind the city of Tirschenreuth near the castle of Plössberg. Was there last year in autumn but very bad conditions, one of my badest castle activities ever. So this time used same location

like two years ago at the end of the village in a wooden-area. Started at 1440 UTC with OE6BFF as first station and was very long time active on the same frequency. Around 140 stations was done there in a row before I left to 30 meters. 20 again almost nothing and finally moved back for a good run on 40 meter CW. There were some cluster spots the days before from german stations why only contacts outside DL. Answer is very easy. 40 meters didn't allow any short distance contacts during the past activities. Not only germany also czech republic and austria only a small number of stations made it into the log. However this time also coming to the end of the operation also 40 meters opened for short-distance contacts. So mainly in the CW-portion of the band I was able to get a lot of germany finally in the log.

Total activity-time were 2 hours 20 minutes and the total reached number were 253 QSO with 242 unique stations.
90 in CW and 163 in SSB.

35 countries reached with the top leading on Nr.1 Italy (39), Nr. 2 Germany (32), Nr. 3 Poland (29), Nr. 4 Ukraine (19), Nr. 5 Belgium (17).

Last QSO was at 1659 with IK2IQC

Thanks for calling in and cu soon on the bands, stay healthy.
