Nature-Reserve Grosser Teichelberg DLFF-0288

One day after my „Schlössl“-trip started after the work to nature-reserve Grosser Teichelberg which is just 2 km away from the trip on the previous day.

Now much warmer and this area almost completely covered by trees.

This was my fifth activity from here since 2015. Last year had from same location bad propagation and only 75 contacts in the log.

This year however much better. Started at 1448 UTC with first station DG1YCF in the log and ended at 1723UTC with YO6DDF as final QSO.

43 contacts on 80 meters, 203 on 40 and 20 on 30 meters. 20 meters was totally unusable. 109 contacts in CW vs. 157 in SSB.

This time 31 DXCCs were worked. Grand total so 266 contacts with 241 unique call-signs made it a very pleasant evening activity.

Top-three countries Germany (48), Italy (38) and Poland (33) contacts.

Since 2015 could hand out this multiplier meanwhile 1034 times to 820 different stations. So thanks for the QSOs and special thanks to those who spotted in the cluster.

Cuagn, don´t send a QSL yourself, you will get ours automatically !!
