Wondrebaue westl. Tirschenreuth DLFF-0801
Castle Falkenberg DL-02335

As the last activity was not too promising in the morning hours, this time tried again the late afternoon propagation. All weekends covered by contest-activities so my trip into Wondrebaue happened after work. Arrived there at around 1400 UTC and the area appeared in beautiful sunshine. The way to the location where I was also active last time was accessible after some rainfalls in the past. The castle Falkenberg is not

visible from there as there is a hill between however is in qualifying distance. Started at 1422 UTC with F5LWF as first station in the log. Soon found out that the afternoon conditions were much better than a few days before from DLFF-0803 in the morning. Also the propagation in general improved extreme. This time the top 3 countries were: 1. Germany (63) 2. Italy (45) 3. Poland (39)

As conditions were so nice tried to extend the stay as long as possible.

In total was 2 hours, 24 minutes in the air.

310 contacts with 36 countries made it into the log. 20 meters was still poor and only 22 contacts there, remaining 288 on 40.

Mode-split this time 75 contacts in CW, 235 in phone.

Only the end was then a bit in hurry. Darkness behind the trees appeared so quickly

that I really had to do to get everything in good condition together. Also the windows of the car started to freeze a bit, so time to leave.

My equipment for the next trips was updated with more light :-)

Thanks for calling in and cuagn soon.
