Wondreb zwischen Leonberg u. Waldsassen
DLFF-0802

After the first activity from that area in march 2021 with poor propagations I gave another try in september.

However also this time Murphy was not with us.

Most of the usual main-areas for WWFF in europe were not reachable at all or with very poor results.

If you look at the scores it is easy to detect.

1. Italy (44)
2. Poland (10)
3. France and Spain (9)
4. England (8)
5. European Russia and Sweden (6)

So very poor propagation to poland, absolutely nothing to germany, austria, czech republic.

So finally ended with 137 contacts into 30 countries.

Also CW couldn't help.
