DP44WCA - DAØCW/p

Spirkenmoor bei Grießbach DLFF-0803

Spirkenmoor is divided by a large cornfield. After a longer break we tried to go out again with two stations. Each of us occupied one side to limit distortions between the stations. Konrad DH6RAE used the side with more sun to load up via his solar-panel. Manfred DF6EX on wooden-side however of course with more than enough battery-power.

We used our two call-signs sometimes were active as DP44WCA and sometimes under DAØCW/p. Unfortunately conditions were not so well that day. Again all the closer countries had poor propagations to us,

so finally not too many stations from there in the log. The day was sunny but cool however in our „shacks“ more or less comfortable.

Our first contact was at 0655 UTC in the log. Our general expectation was to stay there for a maximum time

until 1200, however as the bands were closing at midday more we decided to stop at 1000 UTC. Afternoon as usual a big contest, which was of course also the reason for the poor interest. When propagations so down the

fun is also going away faster.

This was our second trip this year to the area. This time altogether 363 contacts in the log with the main and 266 on 40 meters, 37 on 30 meters, 59 on 20 meters. 249 in phone and 114 in CW. Top5 countries this time:

1. Italy (48)
2. Germany (47)
3. Spain (32)
4. France (30)
5. Belgium and Poland (27)

Konrad DH6RAE had forgotton to make a picture of his setup so finally after the end we met 500 meters behind the area and completed the cable-connections for his new LiFePo-battery on a sunny bench.

In total we could hand out this year the new DLFF-0803 in 1006 contacts to 702 different stations this year.

Thanks for calling in and cuagn soon.
