After some very stormy days in Germany the Saturday was announced as a bit better. However still winds around 50-60km/h.

So trip was not too far away from home-location and antenna-setup was at minimum-level. Mast only up to about 4 meters and the base fixed under the rear-wheel of the car. So only problem was to hang up antenna, put it down and in the middle to change the bands. Antenna was the super thin-wire from

SOTA-beams which had less contact surface for the wind. Of course selected area had no trees or something critical around and was located closed to a small water. Was very surprised on the excellent result under that tricky conditions. 297 stations were worked in 32 countries. Top-scores went to following five:

1. Germany 86, 2. Poland 47, 3. Italy 34, 4. Netherlands 15, 5. England and France both with 13 contacts. This time only 22 in telegraphy, rest in phone.

When turning down the antenna temperature was also down to 3 degrees.

Thanks for calling in and cu from the next one
