Nature-Park Steinwald DLFF-0119  
Castle Schloßl DL-04946

After my friday-activity from march 11 my motivation was not so high to go out, as also my colleague Karl DL1JKK who used the special-call a day later had no good propagation. When sunday midday was arrived, however sun was shining so pretty and a last look on the contest-calendar did change my mind. Using again a castle in closer distance. After 15 min. drive could set up there the antenna again on the small side-road I used also in previous activations. On the top of the hill there was only little traffic, mostly only biker and hiker.

This time IK1MJG made the first log-entry and after 3 slow minutes a super pile-up started. Conditions were brilliant with mostly 59+ signals into whole europe. Especially also short-distance into germany, austria and czech republic also that day super-load.

The queue was always filling with new stations so remained very long on 7.140. The changes to 20 and 30 brought also some DX-stations in the log. 20 was in CW much better running than SSB. At the end of the operation moved back to 40 CW and had there again an extreme pile-up, sometimes had trouble to get under control.

Finally ended with DM1RS as latest station after 3 hours with 412 contacts in the log. Thank you very much.

Top scoring countries:

1. Germany (141)
2. Poland (57)
3. Italy (40)
4. Netherlands (24)
5. France (16), 108 in CW and 304 in SSB with 34 countries.
