My trip nr. 6 into this area was again an after-work activity.

Last part of the road is not so funny, so prefer it normally to make it with the winter-wheels.

After usual quick-setup had my first contact at 1435 UTC.

Begin was quite busy and had the first 176 contacts after the first hour of operation in the log.

When the usual QRM on 40 appeared moved to the other bands but not so many stations there.

For the final end came back to 40 meters. Total operation time was a bit above 2,5 hours.

Made 70 CW-contacts vs. 233 SSB-contacts for a total of 303 QSO into 29 DXCC-countries.

At the end had a long chat with PD2GCM/m with excellent signals in both directions with sometimes 59+ signals.

Top 5 countries this time:

1. Germany (93)
2. Poland (42)
3. Italy (41)
4. Spain (17)
5. Netherlands (14)
