Bergwiesen im südlichen Fichtelgebirge DLFF-0834

Again nice weather on friday so I used the chance to make another trip after work. This time destination was in Fichtelgebirge.

The area is on foot of the Kösseine-mountain. We've been on top there in 2020 from DLFF-0659 which is also a SOTA-summit.

This time was in the surrounding meadows in that area. Found a suitable place in a height of about 760 meters above sea-level where I had a free shot to almost all directions.

Sun was shining the whole stay however outside very windy and temperature between 13 to 15 degrees.

Started at 1317 UTC with SQ5AAJ as first station. 40 meter again at the begin very silent but then after 30 minutes filling quickly.

On 20 meter not so many callers in CW as well in phone. Best results again on 40. Sometimes frequency blocked by some disrupter, also in CW sometimes distortions from radar-signals however at the end an acceptable result.

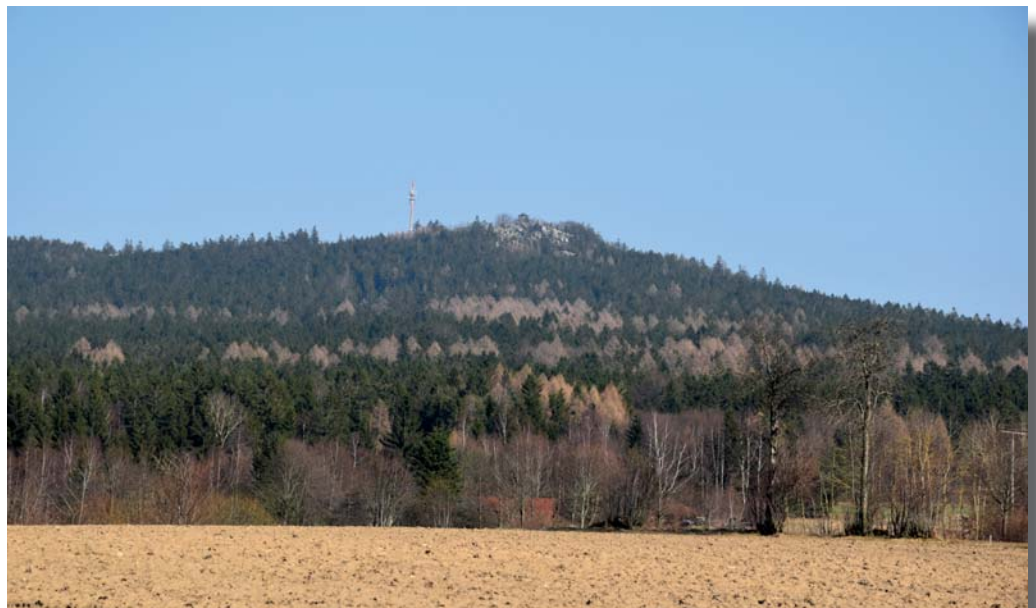

Could make in total 383 contacts with 35 DXCC-countries.

1. Germany (126)
2. Poland (49)
3. Italy (44)
4. Spain (19)
5. France (17)

This time 335 phone contacts and 48 CW-QSOs. 73,44,11
