Nature-Reserve Basaltkuppen in der nördl. Oberpfalz  
DLFF-0908

The weekend 02./03.april since long time was the first one without bigger contest. We originally planned for saturday a bigger activity, however then snow and winter came back.

On sunday when sun was coming out a bit, finally decided to go alone to DLFF-0908. Temparture outside only 1

degree. So had to heat the car extreme on the trip to the area to have an acceptable temperature inside. The area has some interesting looking basalt-caps in the middle of the wood. Woodtrack was extreme muddy so used only one antenna and the wind was steady blowing. Propagation was extreme good on 40 and later 20 meters. The log filling very quickly. At the end had also a good opening on 30 meters.

The feet cold at the end after three hours of operation, however finally could get 442 contacts in three hours of operation with 36 countries which warmed extremely up. Thanks for calling. Top countries:

1. Germany (120)
2. Poland (63)
3. Italy (50)
4. England and Finland (17)
5. France (14)

134 in CW and 308 in SSB

Thanks for calling in and cu from the next one
